FOR IMMEDIATE RELEASE

Karat® makes the world more colorful with new lids

Karat® has released a new line of colorful enclosure lids for hot cups. These items are perfect for adding more color to the presentation of customers' beverages, and have come just in time for fall and winter.

Enclosure lids are already a staple for anyone who serves hot tea, cocoa or coffee. Traditional Karat® enclosure lids are designed to prevent a beverage from splashing out of the top while walking or driving. These lids have a flap over the sipper that closes the cup when desired.

Enclosure lids fit Karat® paper hot cups, sizes 10-24 oz. and are 90 mm. in diameter.

For more information on this new product and more products by Karat®, check out our [catalog](#).

About Karat®

Specializing in food and drink packaging products such as paper coffee cups, plastic cups, food containers, dessert cups, cup lids and more, Karat® is manufactured by Lollicup® USA, Inc. In an effort to be more environmentally friendly, Lollicup® USA, Inc. developed Karat® Earth, a plant-based line of compostable products, including cups, straws, and utensils. Based in Chino, CA, Karat® and Karat® Earth also offer custom printed containers, cups, and napkins for a personalized touch. Please visit www.karatcup.com for more information.
